WHAT WE STAND FOR

GENOLIER FOUNDATION - SWITZERLAND

We are committed to ensuring that patients in need, affected by a disabling, serious or chronic disease, have access to the best treatments, supportive care programs and coachings available within Swiss Medical Network's facilities, enabling them to get back to a satisfying active life.

Furthermore, we support clinical research projects and medical education programs, always with the aim of continuously improving therapies and healthcare options.

GENOLIER FOUNDATION - INTERNATIONAL

We support humanitarian aid projects – either in cooperation with already established and globally active institutions, or directly on site. In terms of sustainable support, our activities focus on the continuous improvement of the medical care on site and the targeted training of the local population.

*«Helping one person may not change the whole world,
but it can change the world for that one person.»* (Author unknown)

WE CLOSE SUPPORT-CARE GAPS

Genolier Foundation was established in 1986 as an independent, non-profit organization, to provide patients in need with access to state-of-the-art treatment methods and aids available within Swiss Medical Network's facilities.

In this capacity, it also supports – through targeted research funds and grants – the continuous development of medical expertise and multidisciplinary competence, thus positively influencing the treatment options and quality of life of the affected patients.

Genolier Foundation is also involved at the international level – while we benefit from a well-functioning healthcare system here in Switzerland, there are still many regions around the world where people die every day due to local medical care not being of sufficient quality or lacking completely. Here, we are involved both, by providing medical equipment and materials and by providing financial and personnel support directly on site, too.

All this is only possible thanks to the generous donors who have trusted us for many years and who support our projects.

Raymond Loretan

President of the Foundation Board

WE HELP PATIENTS IN NEED

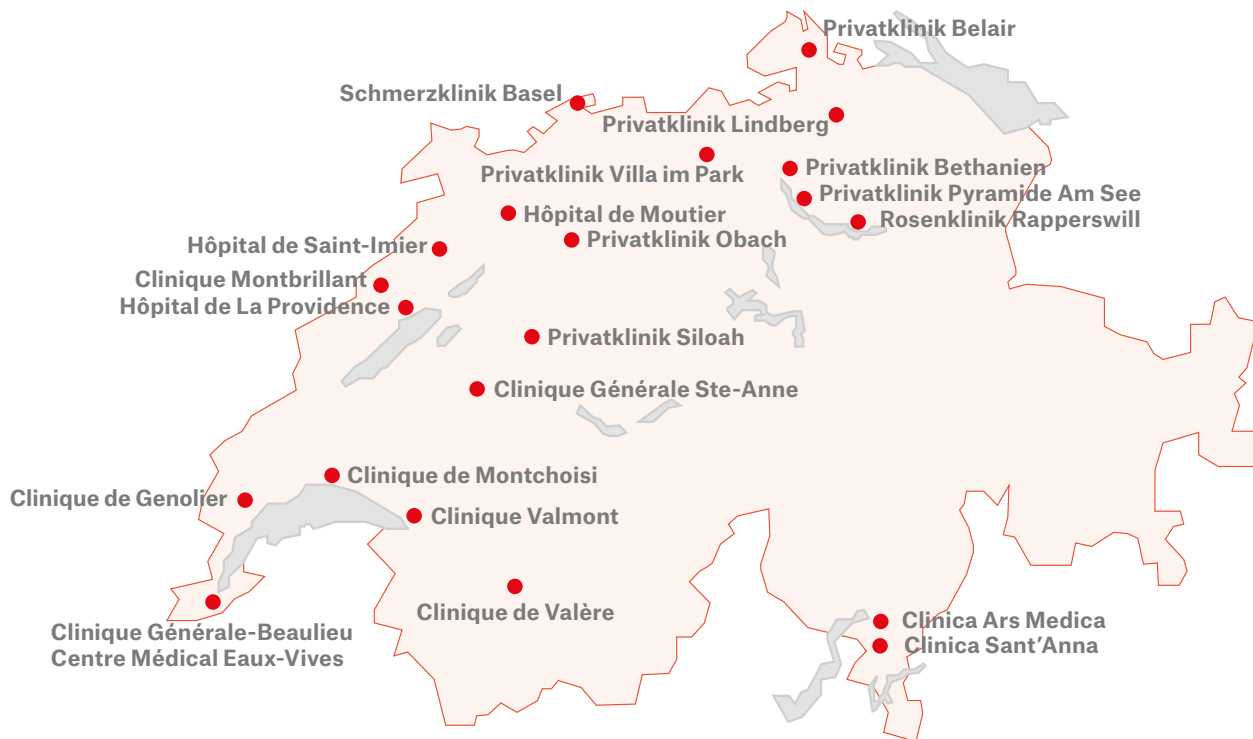

Within Swiss Medical Network's facilities, Genolier Foundation offers the following support to patients in need:

- Access to state-of-the-art medical treatment-options and assistive devices
- Rehabilitation programs
- Supportive therapies
- Individual coaching and group courses
- Mentoring for social and professional reintegration
- Social and legal counseling

This holistic approach enables affected patients to familiarize themselves with their new daily lives. They learn to proactively manage their disease, symptoms and side effects. By gaining self-confidence and autonomy, they make a significant contribution to improving their own quality of life.

NATIONWIDE PRESENCE

(Swiss Medical Network facilities)

EXAMPLES OF SUPPORTIVE THERAPIES AND COURSES

THERAPIES AND COACHING

Social and legal counseling
Coaching (health, family, career etc.)

GROUP COURSES

Yoga classes
Pilates
Fencing
Nordic Walking
Hiking
Stand-Up Paddle
Design, painting, music therapy
Face and body care, make-up tips

CLINICAL RESEARCH AND EDUCATION

With its medical commitment, Genolier Foundation supports clinical research projects that enable patients in need to have access to the latest treatment methods. To this end, the team of medical specialists at Swiss Medical Network's facilities has been working closely with internationally renowned institutions for many years.

Genolier Innovation Hub, planned to open at the beginning of 2024, will significantly strengthen this approach. By creating this unique and privileged environment in Genolier (VD), the best researchers from various fields of biotechnology and from all over the world will come together to shape the medicine of the future.

Genolier Foundation also supports medical and paramedical education programs that have a direct and positive impact on patients' treatment options and quality of life.

INTERNATIONAL HUMANITARIAN AID PROJECTS

In line with its sustainability strategy, Genolier Foundation is also involved in international humanitarian aid projects, contributing both, to the improvement of local medical care and to the education of the local population.

In collaboration with already established and globally active institutions, or directly, we promote and support humanitarian missions through:

- Donations of medical equipment and supplies
- On-site missions (with medical and paramedical staff)
- Fundraising campaigns
- Scholarships

The colorimetric workshop is a small moment of happiness in these days marked by the most diverse treatments and consultations.

Thank you.

(L.P.)

Since the upper limit of complementary therapies covered by the insurance is quickly reached, I was glad to benefit from the Genolier Foundation vouchers. Sophrology, energy treatments, psycho-oncology, and physiotherapy – nothing is superfluous when you have to stop the fears at home that attack you all of a sudden and without warning. The psychological care, based for example on the ILC method (Integration in the Life Cycle), has helped me a lot to reduce the feelings of guilt about the illness and to no longer ask myself what I did to deserve this.

(C.I.)

During my treatment, I received five Genolier Foundation vouchers for massage sessions with Stéphanie.

These treatments helped me a lot and calmed me down during the therapy, which was not easy to manage.

Thanks to the great goodwill shown to me, I was able to get better through this difficult time.

Many thanks for that.

(G.N.)

I am touched that you take such good care of me.

(M.W.)

The osteopath, who took care of me, is a real magician – she managed to take away pain that accompanied me during 11 years!

(L.G.)

As soon as I set foot in this yoga class,
my body receives only positive vibrations.
(C.B.)

I was able to benefit from the Genolier Foundation vouchers to take stock of my professional life after several months without work. It was important for me to consider new possibilities and define new goals after the illness.

Christel knew how to accompany and guide me in my project in a benevolent, professional and efficient way. She knows how to give you back the confidence in yourself and in your own abilities. Thanks to her knowledge and experience in the world of human resources, she gives a lot of good advice, both on new career opportunities and on the practical aspects of writing resumes and cover letters.

It is a real happiness to be so well looked after in these, sometimes, particularly difficult moments, and to feel supported and understood.
(A.M.)

Here I feel like I am in an oxygen
bubble and the physical therapy
is helping me a lot.
(J.D.)

What a beautiful experience, these Sophrology sessions with Christel, who is very sensitive, compassionate and professional. She adapts her experience and knowledge to our current emotional situation and shows us breathing and relaxation techniques that we can use ourselves, when the emotional turmoil caused by illness becomes too much. I have experienced moments of well-being during these sessions, in which one forgets all worries for a moment, and they continued to have an effect even some time after! Without the help of Genolier Foundation, I would not have had the opportunity to experience this, and I thank them sincerely.
(F.Z.)

EVERY FRANC COUNTS!

Thanks to your donation, we not only enable patients in need to access the latest treatment options, but we also accompany them on their way back to an active life.

Help us make a tangible and lasting difference. THANK YOU!
